More Than Magnets: Exploring The Wonders Of Science In Preschool And Kindergarten

Synopsis

Science activities may be neglected in early childhood programs because we don't trust our own knowledge. *More Than Magnets* takes the uncertainty out of teaching science with more than 100 activities that engage children in interactive science opportunities. Prepares teachers and caregivers to ask and answer questions through the Scientific Information, What to Look For, and Suggested Sequence sections.

Grade Level: Preschool - 1

Customer Reviews

After having Sally Moomaw as a professor, I can say that she is a genius in the field of childhood education. I recommend this to an education major, a first year teacher, a fifth year teacher, or a teacher in their 20th year of teaching. It's timeless.

This book is a very good book. These Science ideas are a sure hit in any classroom. You can use it over and over. Also many of these can be changed to fit an older group or a younger group. I can't stress how wonderful this book is!

I have used this book and the *More Than Counting* and *More Than Letters* books, and all are outstanding! They are easy to use and full of ideas.
