The Cicada Prophecy: A Medical Thriller - Science Fiction Technothriller

Synopsis

FOR A SMALL PRICE EVERYONE CAN BE IMMORTAL.WELCOME TO THE BRAVE NEW WORLD.Dr. Richard Ross has discovered a miracle cure for aging. But it comes at a price. Everyone who wants eternal youth must undergo an operation before passing into adulthood that locks their body in the form of a preadolescent youth. When seniors die off, immortal juveniles rise to power and take over the world.But not everyone is happy with the new arrangement. A group of rebels from the Garden of Eden church plots to overthrow the new regime and return the world to its natural order. When juveniles suddenly begin rapidly aging, the entire population is set on a course of imminent extinction.Building to a chilling climax, Dr. Ross and his endocrinologist girlfriend must find and rescue the one remaining person who carries the genetic link for saving the human race.A mind-bending technothriller based on Nobel prizewinning research.Over 200 Goodreads 5-Star reviews.Warning: Most of the characters in this story, although chronologically advanced in years, inhabit the bodies of preadolescent youths. If you're uncomfortable with the idea of such juveniles engaging in adult behaviors, do not read this book.

The Cicada Prophecy By J.R McLeay I have to say that the blurb for The Cicada Prophecy by J. R McLeay immediately grabbed my attention and got me excited in a way that not all blurbs do. I had high hopes for it: a proposed storyline that told the tale of the possibility of eternal life. I waited patiently for the genre to be picked and its turn in my queue. Although I can honestly say that as a whole it was definitely up to snuff, I did have a few issues with it as well. The storyline was exciting and creative to say the least, leaving me not wanting to put it down because I couldn't wait to see what McLeay had in store next. However, I would be remiss if I didn't mention that there were also plenty of moments that certain aspects of it left me feeling slightly let down as well. The storyline pertains to our world in the future where a surgical procedure performed in adolescence prior to puberty prolongs our lifespan indefinitely. The removal of what causes the body to transition from adolescence to adulthood permanently muted leaving humankind outwardly 11-years-old while the mind continues the journey on its own, allowing mental maturity despite the outward appearance. Perhaps this sounds like the cure-all to the problems in our world, but does everyone stand in agreement? How is the world repopulated? Is it truly eternal life? These questions kept me reading! The story is told in 3rd person with the perspective of each of the main characters being thoroughly developed. This became an issue for me only when the focus one of the main characters, Dr. Richard Ross, turned from character and plot development into a dissertation about biology and the like. In addition to being a world renowned neurologist he also teaches bioethics.
