Critical Appraisal Of Medical Literature: Volume 38

Synopsis

Critical Appraisal of Medical Literature provides a step-by-step approach to help the reader reach a good level of proficiency in systematic critical appraisal of medical information. To this end, the book covers all the elements that are necessary to develop these skills and is a comprehensive guide to the subject. The book is written in three parts. The first part focuses on the logical justification and the validity of medical information. Its chapters present basic working definitions and discussions on relevant basic topics of statistics and epidemiology. The second part focuses on the complementary aspects of critique, common study designs and articles whose main topics are treatment, diagnosis, prognosis, aetiology, reviews, medical guidelines, audit, and qualitative research. The third part presents some statistical techniques that are commonly used in published articles. Critical Appraisal of Medical Literature is intended for those interested in developing critical appraisal skills such as psychiatric trainees preparing for the Critical Review Paper of the MRCPsych Examination in the UK, other practitioners as part of their preparation for examinations, and medical professionals and students as part of their introduction to aspects of systematic critical appraisal of medical information.

Customer Reviews

"This book is largely aimed at trainee psychiatrists preparing for the MRCPsych examination but it is also intended for use by professional's interested in improving their understanding in this area. It is very readable, topics follow sequentially and clearly a lot of thought and effort have gone into communicating the subject to the reader. Tricky concepts are explained effortlessly and with clarity. Each chapter ends with a useful summary, which can be used for revision purposes. Those already possessing a more basic text might find this book useful to dip into for a more thorough explanation... This is a useful, largely comprehensive and well written text... Whilst not a book for the compulsive crammer I am certain many would choose it in preference to existing titles." - By Justin Sauer, Maudsley Hospital
