Customer Reviews

First of all there is no order to this study guide at all. You can only take the test once, and I haven't taken maternity or pediatrics yet so i thought my scores would be way off and reflect the wrong things I need to focus on. However. There is no specific study guide for anyone and the pre test is 100% pointless. No matter who you are or what you score you have the exact same study guide as everyone else, just maybe in a different order. I know this because I re entered the same scores multiple times and they just move around the order of the modules to read first. Even if I completely change all my scores. Same thing. The first time I entered in my scores to produce my "study guide" all it gave me was a randomized list of which stuff to study first. Well I never printed my study guide- so when I went back the second time it doesn't even save your study scores you have to enter them again- and upon entering them again I got the same exact thing except in a different order. They don't tell you to study this more or that more, they just have you read the same exact thing as If you scored all 0s or all 100s. Also the wording is very simplistic (they don't even use medical terminology). I feel like I am so far advanced for this "content". This is literally only the very very very bare basics, no one could pass the nclex by reading these "notes". And that's all this is. 20 pages of the most basic nursing content notes you could ever imagine. I'm on health and wellness and I pressed a video to watch how to teach a man to give himself a testicular examination, and instead i have a video of an ophthalmic eye exam. In which is also EXTREMELY basic, I learned more in my classroom with the teacher. I feel duped and ripped off. What a waste of money!
