The Thought Pushers by Dima Zales dives deeper into the shadow world of mind readers and mind controllers in present-day Brooklyn. The Russian expats, Mira and Eugene, are getting closer to tracking down the Russian mobsters that killed their parents. Our mind-reading hedge fund manager, Darren, meets some new friends, some unexpected family members, and begins to learn about his hidden origins, what they are and why they have been hidden. The previous book in this series, *The Thought Readers*, introduced us to this world and described the events surrounding these mind readers as seen through Darren's eyes as he discovers the new world that has opened up for him. This book introduces us to the vibrant world of the mind controllers, the other side of the coin for in this mental universe. We learn more about the mysterious Pushers and their

secret community, how they are integrated into modern life, yet apart from it in their hidden society. Darren starts to have a double life everywhere he goes, since the mind readers think heâ€™s a mind reader, and the mind controllers think heâ€™s a mind controller, and each group has a serious level of antagonism toward the other group, at least when theyâ€™re not trying to kill each other. Darren has to constantly decide how much of the truth, as he discovers it, to tell everyone, so as not to be labeled the enemy. It is a sad, but hysterical commentary on human nature that each group has a warm-and-fuzzy name for themselves (Readers and Guides), and a nasty cold name for the other group (Leachers and Pushers). How true of real life, and a touch of genius by the author.
