Customer Reviews

If you're into warhammeer this is the best of it by far. although i like the current 5th edition, when reading the 2nd it seems less complete. In this edition you can really play all the ends of your army, including eldar exodites. If. You haven't tried this. Edition I reccomend you really consider it. It does play a little different too, but its simple. Whether than role attaker and denfenders on a base of 7 and then against armer for wounds. Your armor means something and provides negatives to the attacker.
