The Foundation: A Great American Secret; How Private Wealth Is Changing The World

Synopsis

Private foundations have been the dynamo of social change since their invention at the beginning of the last century. Yet just over 10 percent of the public knows they even exist; and for those who are aware of them, as well as even those who seek grants from them, their internal workings remain a complete mystery. Joel Fleishman knows the sector like few others, and in this groundbreaking book he explains both the history of foundations—with their fledgling beginnings in the era of the robber barons seeking social respectability—through to the present day. This book shows how, why foundations matter, and how the future of foundations can provide a vital spur to the engine of the American, and the world's, economy—if they are properly established and run.

This is a very helpful book, indeed, a unique book. Here are some of the notes I took. As one of 24 co-founders of a new 501c3, the Earth Intelligence Network, created to provide decision support to foundations, the United Nations, NGOs, and others seeking to address the ten high-level threats to Humanity, I could not have found a more relevant work. A few notes: * Foundations are the dynamo of social change, with three roles varying from foundation to foundation: as driver, as partner, or as catalyst. * The author is very critical of the general state of mismanagement and in some cases, lack of clear ethical guidelines or stated values, and says the field must do better. * In his view, and his

case studies bear this out, foundations are an enormous force for good, but they are unregulated, unaccountable, and if they are to retain the tax breaks and the trust of the people, they must change their process, their governance, and their attitude--this will, in the author's words, strengthen the social contract within which they are given so much leeway.* He states that foundations *need* a decision-making process (music to my ears) and also a progress-checking system.* He clearly communicates the willy-nilly state of many foundation programs, their lack of boundaries and focus, and hence their relative lack of impact. He states that many underperform, are insulated, and are arrogant.
